

CyCIS IN CONVERSATION · 25-MINUTE DISCUSSION

Cyber is now an *HSSE* issue.

Securing the Caribbean's energy and industrial backbone — from the control room to the boardroom, and from Point Lisas to the global table.

2017 Attackers moved through a petrochemical plant's IT and OT networks onto its safety instrumented system — the controls that trigger emergency shutdown.

Source: FBI Private Industry Notification, "TRITON Malware Remains Threat to Global Critical Infrastructure ICS," 24 March 2022.

01 · THE CONTROL ROOM

When a cyber incident becomes a process-safety event, what must HSSE and operations leaders change in drills, permits and emergency response?

02 · THE REGION

No Caribbean operator can defend alone. How do sector ISACs, shared intelligence and common standards turn a fragmented region into one defence?

03 · THE GLOBAL TABLE

How does the Caribbean speak with one voice — through DORE, insurers and the new UN Global Mechanism on ICT security?

FRAMING · 5 MIN

MODERATED DISCUSSION · 12 MIN

AUDIENCE & MEDIA Q&A · 8 MIN
