# DESIGN CAPABILITIES

# o o 🕦 o

### FEATURES

- concept and prototype development
- virtual prototyping: optical design and solid modeling
- customer driven design

FiberTech Optica

© August 2008 FiberTech Optica Inc.

# ANGLED TIP ASSEMBLIES

••••

## FEATURES

- small bend radii
- tight bend tolerance
- various angles

FiberTech Optica

# COMPLEX ASSEMBLIES

#### FEATURES

- custom ferrules
- linear arrays
- fiber mapping
- multi-branch

Front view of the ferrule

### www.fibertech-optica.com

FIBER OPTIC ASSEMBLIES for research, industrial, medical and military applications. FiberTech Optica has capabilities from custom design, engineering, prototyping through to volume production.

#### MAPPED OR STRUCTURED • single or multi-branch • arbitrary geometries and

fiber distributions • large fiber counts

"Serpentine" mapped 2D array Specialized reflectance probe

#### HIGH POWER

- free-standing fiberssingle fiber or bundle
- construction
- epoxy-free light path Free-standing bundle of 37 fibers

- LINEAR ARRAYS • small fiber core sizes (<50µm)
- stripped fibers
- tightly packed or spaced

Array of 50µm fibers inside SMA connector Slit of 19 fibers spaced 2mm apart

- NEEDLES
- single or multiple fibers
- straight or angle polished
- smallest diameter 250µm
- 6-around-1 needle, 950µm in diameter

VACUUM • penetrating or receptacle feedthroughs • single or multiple fibers

Receptacle feedthroughs with NPT thread and SMA connectors

### REFLECTANCE PROBES

- arbitrary excitation/collection geometries
- industrial or laboratory grade
- 29-around-7 curved tip probes

MULTIPLE BRANCH

any number of branches
custom fiber distribution
variable branch lengths

128 branch 2D array

#### INDUSTRIAL

- lengths up to 350 meters
- rugged, with multiple levels of protection
- reinforced connectors/ferrules
- high temperature/pressure
- 300 fiber bundle, 10 meters long

## www.fibertech-optica.com

FIBER OPTIC ASSEMBLIES with application-specific designs. Custom configurations and fiber mappings. Wide selection of fiber parameters/properties. FiberTech Optica has capabilities from custom design, engineering and prototyping through to volume production.

#### MAPPED

- sensing application
- 337 fibers, 100µm core
  successive layers within
- hexagonal end arranged along the linear array
- MULTIPLE BRANCH
- 55 branches
- 50µm core fibers
- fibers arranged into a cross within
- 2mm diameter circle

- single or multi-channel
- arbitrary fiber distribution

.....

.....

.....

- straight or curved geometry
- randomized, mapped or coherent

#### MAPPED

- imaging application
- 648 fibers, 50µm core
   successive layers within 2D array mapped into segments within 4 parallel arrays

CUSTOM BUNDLE

imaging application
460 fibers, 40µm core
successive layers

MAPPED

- 1148 fibers, 200µm core,
- divided into 28 channels

within 2D array mapped into segments within 2 parallel arrays

EDM machined parts

#### MIXED FIBER

- different fiber sizes/typessingle or multi-branch
- arbitrary geometries and
- fiber distributions • large fiber counts

- MASKED
- custom mask to modify fiber output
- precise (± 5µm) alignment
