

FEATURES

- free-standing fibers
- single fiber or bundle construction
- epoxy-free light path
- tightly packed fibers
- stripped buffer

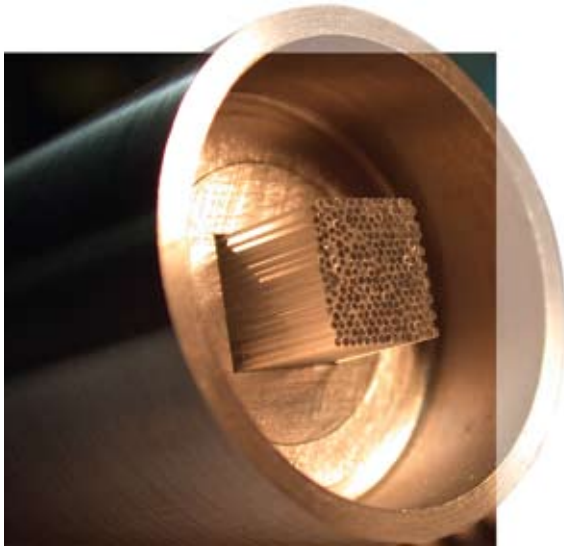

Free-standing, tightly packed hexagonal bundle of 37 fibers, 600 μ m core

Free-standing bundle of 19 fibers, 600 μ m core

Input end

FEATURES

- free-standing fibers
- epoxy-free light path
- stripped buffer

10 meter long bundle of 600 μ m fibers, cleaved and aligned to 100 μ m for high power excimer laser delivery

Output end

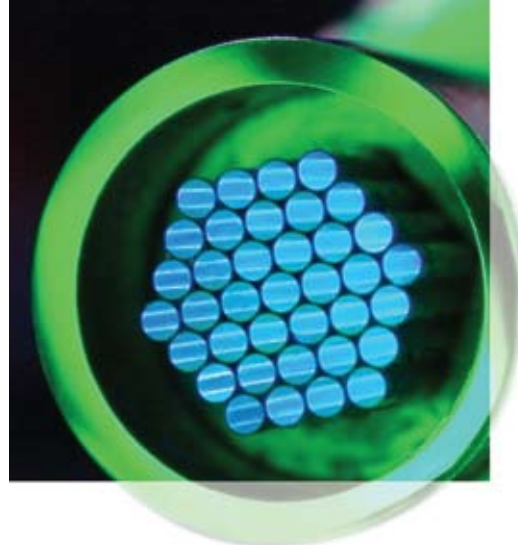

FEATURES

- free-standing fibers
- epoxy-free light path
- tightly packed fiber bundles

*1000 μ m fiber in a special
long nut SMA connector*

*Free-standing, tightly packed
hexagonal bundle of
37 fibers, 600 μ m core*

*800 μ m fiber in a high
power SMA connector*
