

FEATURES

- rugged, with multiple levels of protection
- reinforced connectors/ferrules
- high temperature/pressure
- optical elements

*In-process reflectance probe;
built to withstand high temperature environment
(250°C) and abrasive substances*

*High pressure (20 bar) and
temperature (150°C) reflectance
probe with a sapphire window;
built for operation in corrosive
environments*

*Ruggedized glass
bundle for food
processing application*
