

Why Finance Should Consider Agile Modern Data Delivery Platform

LYFTRONDATA FOR FINANCE

The Financial departments demands solutions that are highly scalable and at the same time offer a safe and secure environment for all transactions. They also require a holistic view of their enterprise to manage their finances more efficiently.

However, legacy tools failed to meet the stringent requirements of the finance departments, and the industry quickly had to adopt the cloud to meet their ever growing needs.

Lyftrondata provides agility and flexibility to the enterprise along with unrepresented growth opportunities.

Here is how Lyftrondata revolutionized the Finance

360° view of the Business

Tracking every penny is now easy. Consolidate data from all your departments, partners and customers and manage your finances effectively.

Automatic Scaling

Never spend extra for the surge in your data. A unique pay as you go service which allows you to pay only for the resources that you have used.

Time Saving

Quick and efficient processing. Drastically reduce your data processing time and focus more on solving problems than reconciling data.

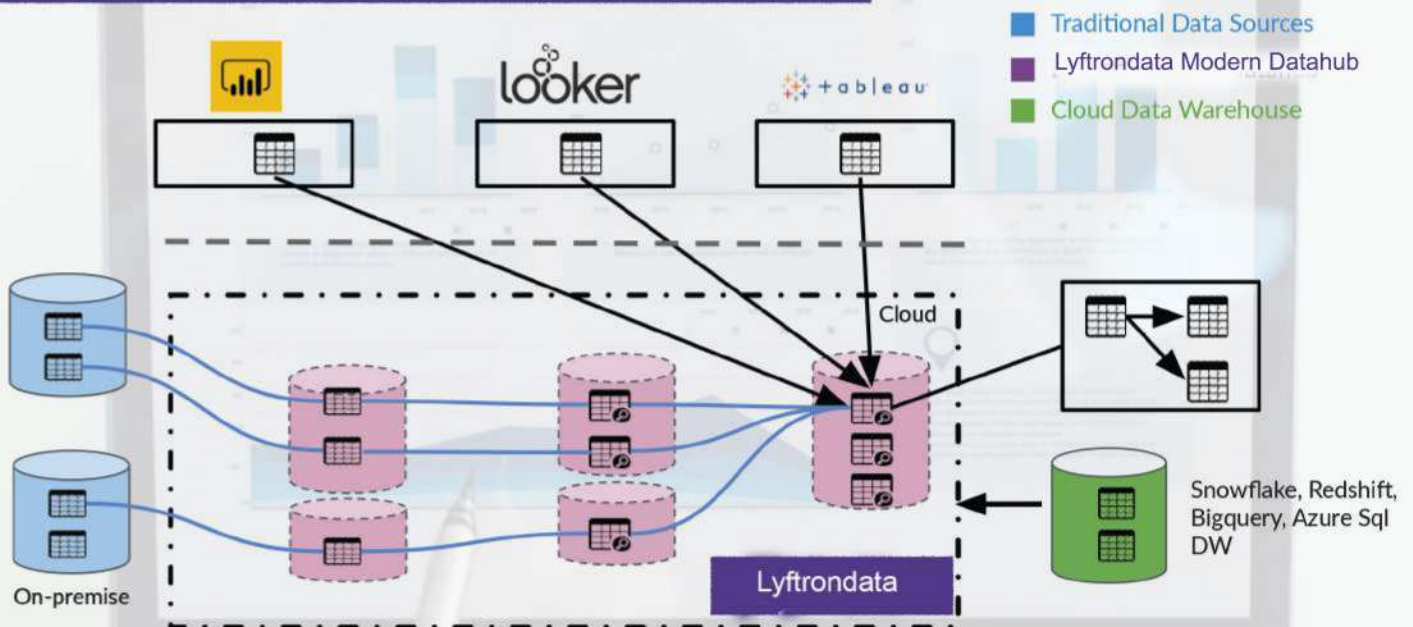

Comprehensive Dashboards

Efficiently track your payments and receivables. Detailed dashboards that help you to visualize all your payables and receivables, so that you can gain better control on your business

A TRANSFORMATIONAL STEP FOR BI ACCELERATION GUIDED BY THESE USE CASES

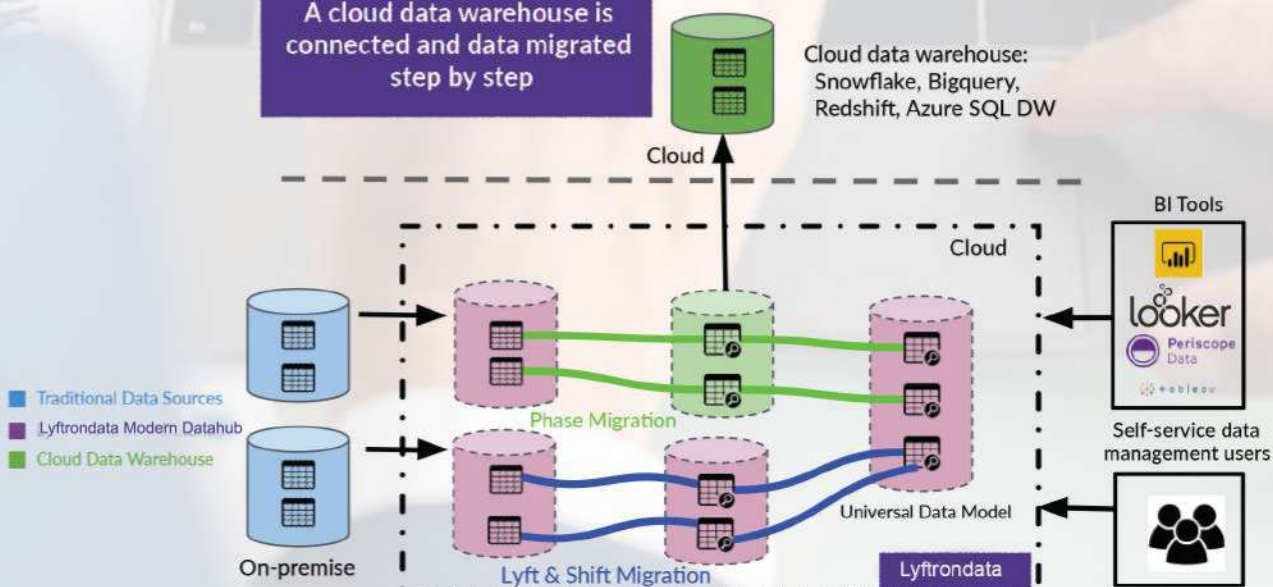

Agile Universal Data Model

Lyftrondata provides universal data model capability that enables changes from the source dynamically in the semantic layer and allows enterprises to avoid manual semantic data model changes.

Cloud Migration

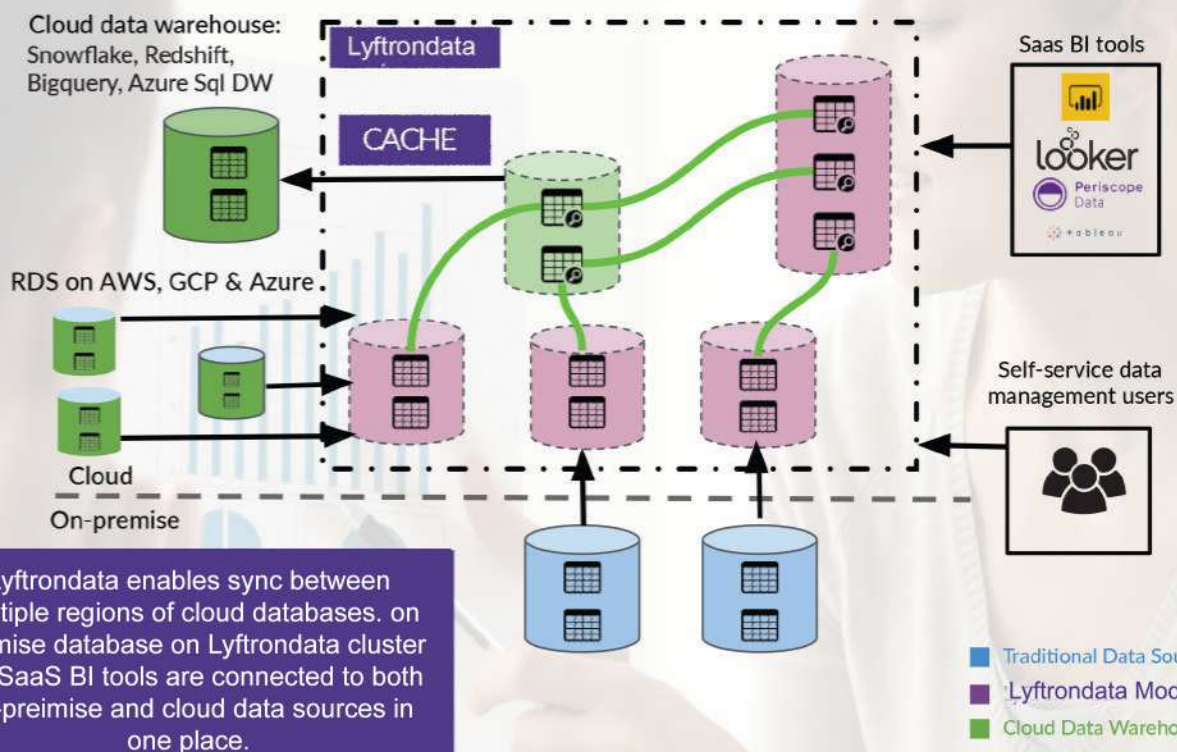

A cloud data warehouse is connected and data migrated step by step

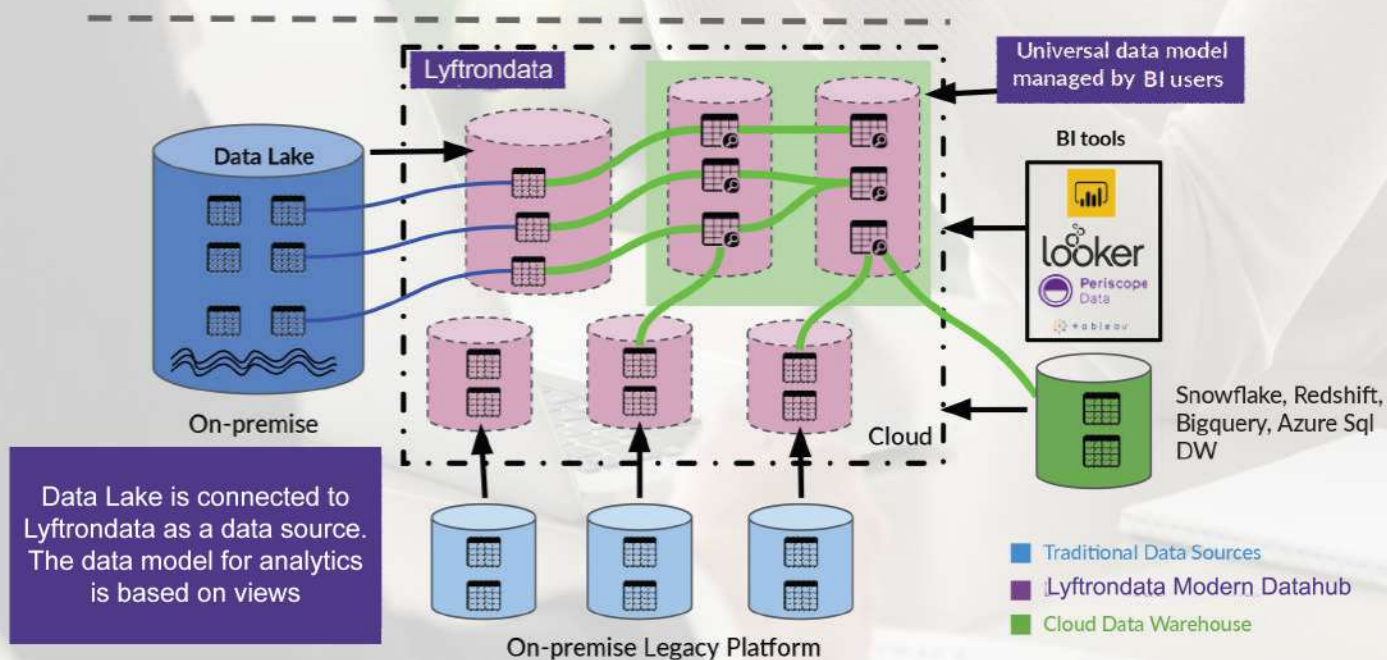

INSTANT BI WITH ZERO ETL/ELT

HEADACHES UTILIZING THESE USE CASES

Hybrid Cloud Management

Governed Data Lake Analytics

TOSS THE COMPLEXITY EMBRACE SIMPLICITY

Democratize data with ANSI SQL

ANSI SQL Lyftrondata's modeling layer, allows customers to define business logic so everyone in the organization can get reliable and consistent results no matter how SQL-savvy they are. This makes it possible for customers to avoid arguing over conflicting results and how data was pulled in the first place, and focus more on taking concrete actions based on results.

Hybrid Cloud Management

Build a hybrid cloud data warehouse that acts as a data bridge between leading cloud platforms, on-premise data warehouse, and data sources. With Lyftrondata, users can instantly access all data from different regions in a datahub and migrate from legacy database to a modern data warehouse without worrying about coding data pipelines manually.

Enterprise wide data catalog & data lin-

Enable full database object search guided by the principles of tagging, alias and data set definition. Lyftrondata's platform empowers data analysts to collaborate with ease. The data lineage process is also simplified, enabling teams to monitor data sets usage to maintain a healthy warehouse.

Shorten time to insights

Empower data savvy users to find and prepare the data they need for analytics. Enable real-time access to any data source from any BI tool.

BI acceleration

Lyftrondata is a data layer for business intelligence that both simplifies data loading to a target data warehouse and also modernizes the traditional data warehouse architecture, adding true real-time query capabilities.

Enhance security of data

Register over 140+ types of data sources in one place. Choose the most valuable data sources and replicate them to the cloud.

DELIVERING ON THE PROMISE OF TRUE
SCALABILITY AT THE LOWEST COST
