

A photograph of two women sitting at a desk in an office, engaged in a conversation. The woman on the left has dark hair in a bun and is wearing a grey blazer. The woman on the right has curly brown hair and is wearing a grey sweater, gesturing with her hands as she speaks. A laptop and some papers are on the desk.

## Why HR Should Consider Agile Modern Data Delivery Platform

### LYFTRONDATA FOR HR

The need for integration with various systems such as payroll processing, administration, finance and IT motivated the HR departments to opt for sophisticated solutions that help them to handle the variety in the data.

#### Improved Employee Productivity

Less dependency on HR for information. With easy access to information employees can now plan their work more efficiently and effectively. Managers can now take more strategic decisions while maintaining integrity and accountability.

#### Efficient Integration

Easily integrate systems and share data in real time. You can utilize all of the features and benefits of a unified, HR solution by integrating payroll and timesheets. Utilize the power of data to offer unique benefits such as retirement plans, insurance coverage and more.

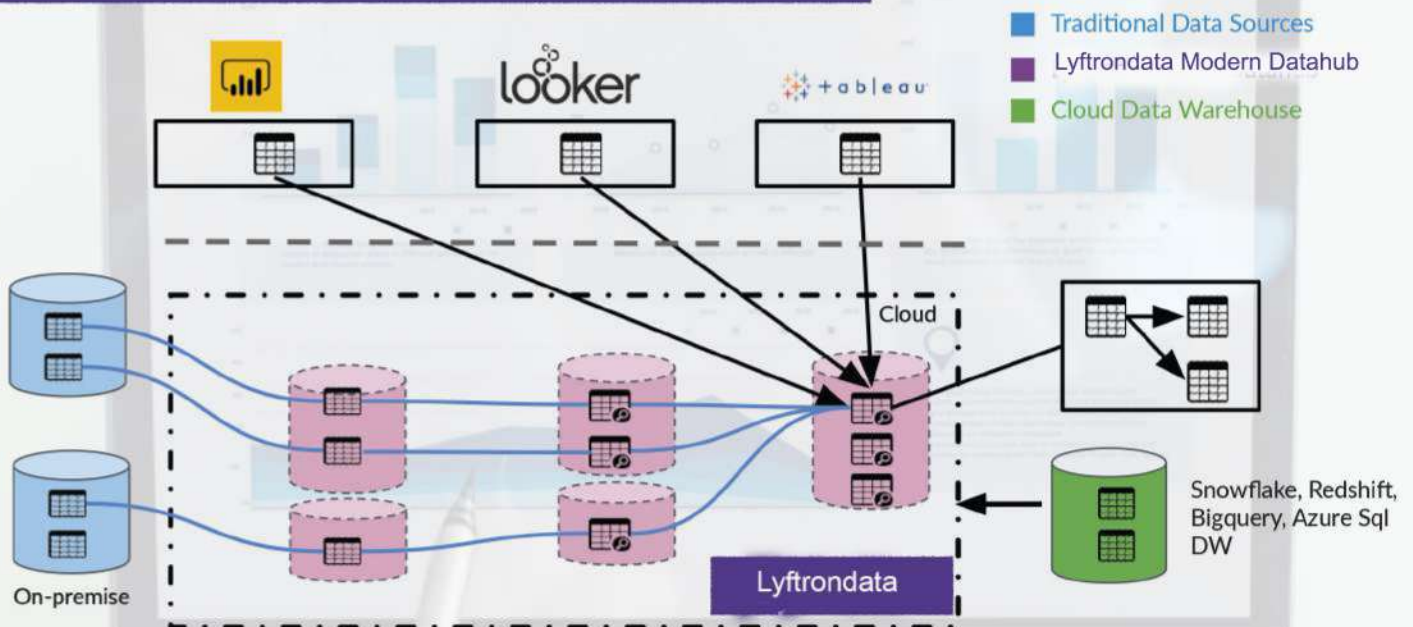

#### Data Consolidation

Gather data from all your sources. Attain uninhibited access to crucial data sources and achieve a sophisticated communication experience.

# A TRANSFORMATIONAL STEP FOR BI ACCELERATION GUIDED BY THESE USE CASES

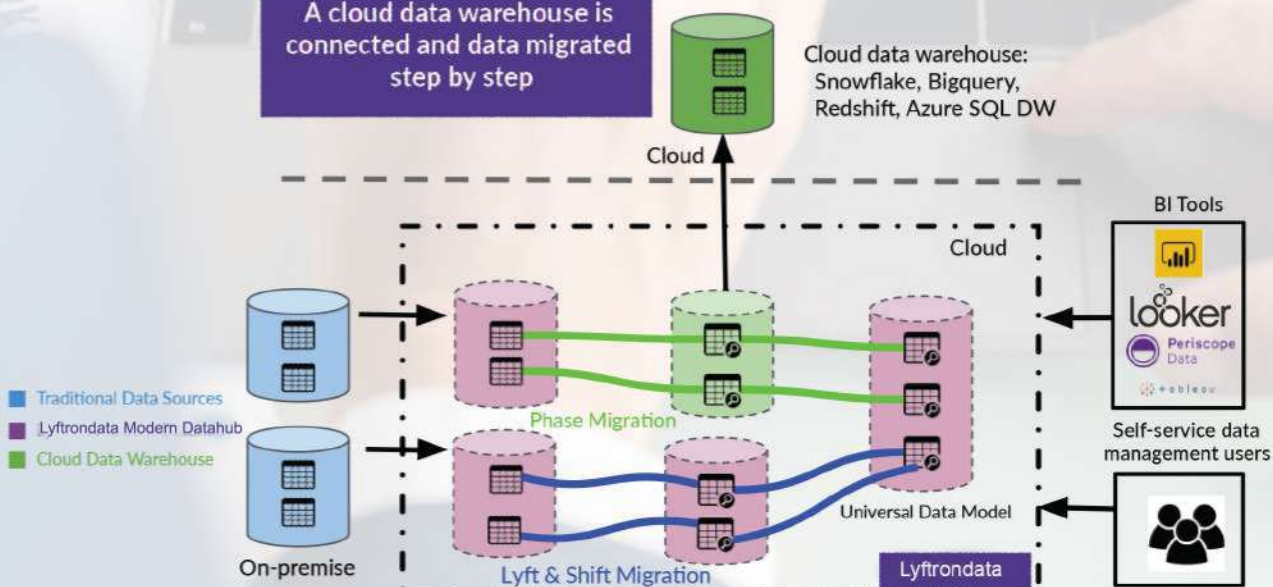

## Agile Universal Data Model

Lyftrondata provides universal data model capability that enables changes from the source dynamically in the semantic layer and allows enterprises to avoid manual semantic data model changes.

## Cloud Migration

A cloud data warehouse is connected and data migrated step by step

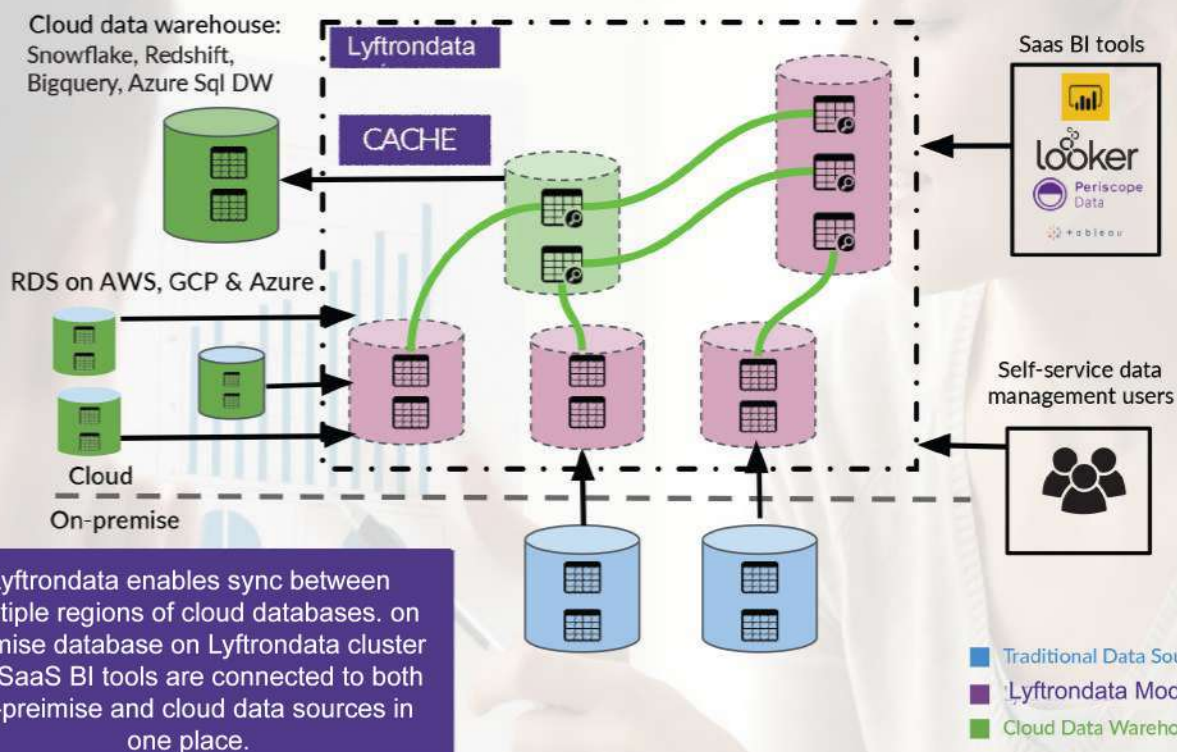

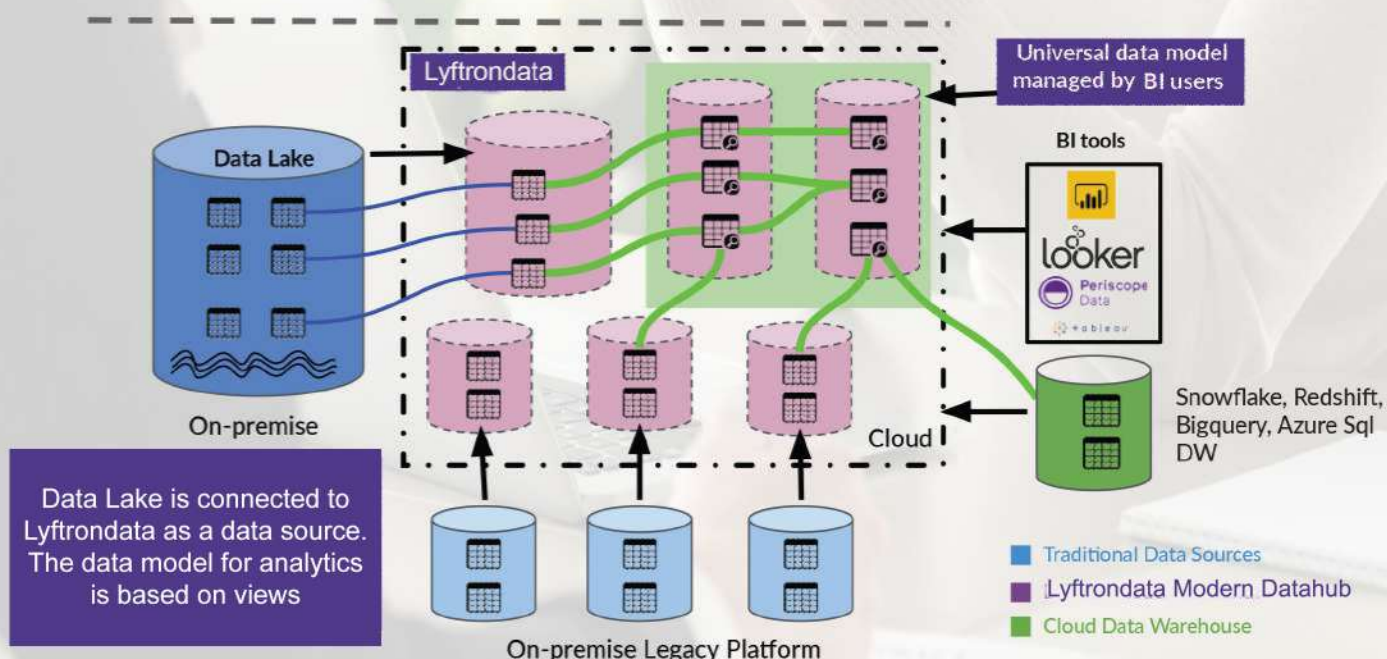

## INSTANT BI WITH ZERO ETL/ELT

## HEADACHES UTILIZING THESE USE CASES

### Hybrid Cloud Management

### Governed Data Lake Analytics

# TOSS THE COMPLEXITY EMBRACE SIMPLICITY

## Democratize data with ANSI SQL

ANSI SQL Lyftrondata's modeling layer, allows customers to define business logic so everyone in the organization can get reliable and consistent results no matter how SQL-savvy they are. This makes it possible for customers to avoid arguing over conflicting results and how data was pulled in the first place, and focus more on taking concrete actions based on results.

## Hybrid Cloud Management

Build a hybrid cloud data warehouse that acts as a data bridge between leading cloud platforms, on-premise data warehouse, and data sources. With Lyftrondata, users can instantly access all data from different regions in a datahub and migrate from legacy database to a modern data warehouse without worrying about coding data pipelines manually.

## Enterprise wide data catalog & data lineage

Enable full database object search guided by the principles of tagging, alias and data set definition. Lyftrondata's platform empowers data analysts to collaborate with ease. The data lineage process is also simplified, enabling teams to monitor data sets usage to maintain a healthy warehouse.

## Shorten time to insights

Empower data savvy users to find and prepare the data they need for analytics. Enable real-time access to any data source from any BI tool.

## BI acceleration

Lyftrondata is a data layer for business intelligence that both simplifies data loading to a target data warehouse and also modernizes the traditional data warehouse architecture, adding true real-time query capabilities.

## Enhance security of data

Register over 140+ types of data sources in one place. Choose the most valuable data sources and replicate them to the cloud.

DELIVERING ON THE PROMISE OF TRUE  
SCALABILITY AT THE LOWEST COST
