Most important symptoms and effects, whether acute or delayed	Harmful if swallowed, in contact with skin or if inhaled. May cause respiratory irritation. Causes skin and eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. Direct contact with eyes may cause temporary irritation. Causes damage to organs through prolonged or repeated exposure.
Additional information.....	Treat victims symptomatically. In the event of an incident involving this product ensure that medical authorities are provided a copy of this safety data sheet.

SECTION 05: FIRE-FIGHTING MEASURES

Suitable and unsuitable extinguishing media	Media suitable for other combustible materials in the area.
Special protective equipment and precautions for fire-fighters	Firefighter should be equipped with self-contained breathing apparatus and full protective clothing to protect against potentially toxic and irritating fumes. Cool fire-exposed containers with cold water spray. Heat will cause pressure buildup and may cause explosive rupture. Keep run-off water from entering sewers and other waterways. Dike for water control.
Unusual fire / explosion hazards.....	None expected.
Specific hazards arising from the hazardous product, such as the nature of any hazardous combustion products	Combustion will result in the usual decomposition products, including oxides of carbon.

SECTION 06: ACCIDENTAL RELEASE MEASURES

Leak/spill.....	Spilled product causes a risk of slipping. Contain the spill. Avoid all personal contact. Ventilate. Eliminate all sources of ignition. Prevent runoff into drains, sewers, and other waterways. Absorb with an inert dry material and place in an appropriate waste container.
