

■ SERVICE BRIEF

Microsoft Purview *Deployment*

re

This document outlines the scope, deliverables, responsibilities, and terms governing Redesign's Microsoft Purview Deployment Services. These services enable data classification, information protection, and compliance monitoring across Microsoft 365 and hybrid data environments through the deployment and configuration of Microsoft Purview components.

This service engagement is governed by this Service Brief and associated with SKU: GOV-PURVIEW-DEPLOY.

The quantity defined in the quote represents the number of on-premise databases, Microsoft 365 repositories, and Microsoft 365 user groups to be deployed within Microsoft Purview.

The FUTURE BELONGS
to the CURIOUS.

01. Services Overview

Redesign's Microsoft Purview Deployment Services help organizations implement Microsoft's unified data governance and compliance tools across Microsoft 365 and hybrid data environments.

This includes configuration of labeling, data loss prevention (DLP), Insider Risk, eDiscovery, audit, and data lifecycle policies to support regulatory, security, and operational goals.

02. Offer Structure

PRIMARY SERVICES

- Configuration of Microsoft Purview compliance solutions
- Enablement of key features: sensitivity labels, DLP, retention, activity auditing, and more
- Deployment of supported data connectors for cloud or on-prem systems
- Testing and validation with designated users or data sources
- Or integration with SIEM/SOAR platforms

OPTIONAL ADD-ONS

Separate SOW

- Custom regulatory mapping (e.g., HIPAA, CMMC, GDPR)
- Integration with third-party data sources
- Ongoing monitoring and policy tuning (via Managed Services)

03. Project Scope

This engagement includes the deployment and configuration of selected Microsoft Purview features across agreed-upon data sources and user groups. Scope may include cloud-only or hybrid environments, depending on licensing and infrastructure readiness.

In-Scope Activities

- Review of compliance goals and data protection requirements
- Configuration of sensitivity labels and label policies
- Setup of DLP policies (Microsoft 365 workloads)
- Enablement of auditing, activity alerts, or insider risk indicators
- Deployment of supported data connectors (e.g., SharePoint, Exchange, Teams, OneDrive, file shares, SQL)
- Testing and validation in production or pilot mode

04. Quantity & Effort Model

- **Service SKU: GOV-PURVIEW-DEPLOY**
- **Quantity: Number of databases, repositories, and user groups**

05. Services & Key Activities

Stage	Key Activities
 Discovery & Planning	<ul style="list-style-type: none">▪ Review current Microsoft Purview readiness▪ Align deployment scope with compliance priorities▪ Confirm licensing, access, and supported workloads
 Configuration & Setup	<ul style="list-style-type: none">▪ Configure label and policy sets (e.g., sensitivity, retention, DLP)▪ Deploy data connectors to ingest or monitor data from supported sources▪ Enable auditing, Insider Risk, or Communication Compliance features as scoped▪ Assign label/policy scope to selected user groups or repositories▪ Conduct pilot group testing of labels and policies
 Deployment & Verification	<ul style="list-style-type: none">▪ Monitor telemetry and alerts for enforcement accuracy▪ Address issues or gaps prior to broader rollout▪ Assign labels/policies to all in-scope user groups and repositories
 Documentation & Close-Out	<ul style="list-style-type: none">▪ Deliver configuration summary and access model▪ Provide export of policy definitions▪ Schedule final knowledge transfer session

06. Deliverables

Microsoft Purview
Deployment
Summary

Knowledge
Transfer Session
(virtual, 1 hour)

07. Services Scope Changes

Changes to deployment quantity, integration points, or compliance frameworks may require a revised quote or new SOW.

08. Services Scope Exclusions

Unless explicitly included, this service does not cover:

- Custom PowerShell or API automation
 - Third-party or unsupported connector integration
 - Retrospective content tagging or cleanup
 - Legal hold management or eDiscovery fulfillment
 - Long-term monitoring or enforcement tuning
-

09. Customer Responsibilities

- Provide Global Administrator (Minimum Global Reader required) or Purview role-based access
- Supply list of in-scope users, groups, and repositories
- Confirm regulatory or classification goals
- Validate test results during rollout
- Approve final configurations and close-out

Failure to meet these requirements will prevent Redesign from delivering the services outlined in this Service Brief.

10. Services Schedule

- **Start Date:**
Upon quote acceptance and platform access
- **Completion:**
Final deliverables submitted and knowledge transfer completed

11. Terms and Conditions

This engagement will be governed by the Seller's terms and conditions located at:

ⓘ SERVICES WILL NOT BEGIN UNTIL THE FOLLOWING PREREQUISITES ARE MET

- Signed quote referencing SKU: GOV-PURVIEW-DEPLOY and quantity
- Access to Microsoft Purview platform and Microsoft 365 tenant
- Licensing validated for scoped features
- Stakeholders identified and available for collaboration

Failure to meet these requirements will prevent Redesign from delivering the services outlined in this Service Brief.
