VESTS

SALUS

Fitting your baby into our Bijoux

for babies 9-25 lbs.

- 1 Undo the front clips and slide baby into the bottom half of the vest with the foam facing the front
- 2 Fasten the front clips and adjust to where needed for baby's comfort and security

- 3 On the back of the PFD adjust the webbing within the mesh. There are two adjustment tabs, one near the head and one on the left body. The double strap system makes this jacket easy to adjust to achieve a custom fit.

Fitting your child into our Nimbus

for infants 20-30 lbs., children 30-60 lbs., and youth 60-90 lbs.

- 1 Select a PFD that fits the weight range of your child. These weight ranges can be found on the label as well as the inside left front side of the jacket.
- 2 Unbuckle crotch strap and get child to put on PFD. Zip up front, and buckle all buckles.

- 3 Tighten body strap to allow for comfortable movement but tight enough that nothing is hanging loose.

- 4 Tighten crotch strap to allow for comfortable movement and sitting, making sure no parts are hanging too loose.

We are proud to say that every Salus PFD is made in Waterloo, Ontario. Every part of the process - from hand cutting foam and fabric, to embroidery and assembly - is done in house by Canadians who take great pride in their work. Our patented manufacturing process eliminates the hard square edges found in traditional PFD construction, making our vests soft, pliable and comfortable for your child's every movement.

Being a Canadian manufacturer has its advantages. We are able to stay on top of production details, customization and quality. Our commitment to environmental responsibility is easily monitored and maintained. From recycling as much material as possible, to finding new use streams for scraps...we close the loop wherever possible. However one project that isn't so easy to see from the sewing room floor are the solar panels covering the entire roof of the building which generates clean green energy for the grid. Quality control, environmental responsibility, creating jobs for Canadians: are all reasons to be proud to be a Canadian manufacturer.

As parents, we put safety first. In designing the Salus **Bijoux**, we stepped outside the confines of existing standards to offer unprecedented security, safety and comfort for babies 9 – 25 lbs. The front design ensures that baby turns face-up from a face-forward position. The collar cradles the head when lifted by the strap or while floating. Mesh harness and short front enhance comfort sitting upright and lying down.

Three piece collar design with additional flotation on sides to cradle baby's head in center of collar for security and comfort

Easy access into vest with the two shoulder adjustment buckles

Short front for enhanced comfort while in the sitting position

Dry-Lex Aerospace® liner for breathability, temperature control, drainage and comfort for baby

Mesh back allows the baby to lie comfortably on a blanket or baby carrier

Easy to reach lifting strap

Adjustable mesh and webbing harness system for security, venting and comfort

IMPORTANT: Four adjustment straps should be as snug—and secure—as possible while maintaining comfort for your baby. Once fitted, familiarize your baby and yourself with the performance of the vest in the water.

Cute & Cheerful

Inspired by nature and animated with colour, the Salus **Bijoux** comes to life with five new refreshing designs.

Baby: 9 - 25 lbs.

Bijoux

BABY VEST

What Set's Bijoux Apart:

- Unique vest shape specifically designed to fit a baby's body
- 3-piece collar cradle to protect baby's head; provides support, stability and acts as a headrest
- Cooling features- mesh back harness and Dry-Lex material allow baby to stay cool and comfortable on hot days
- Will flip baby onto their back should they land in the face-forward position

Nimbus

CHILDREN'S VEST

Photo Credit: @five2nine_ca

The Salus **Nimbus** makes water play safer for children and more relaxing for adults. All PFD's float but they can't save lives if children won't keep them on. Designed for comfort and soft to the touch, the Nimbus encourages children to wear it for hours at a time. Specially contoured to hug little bodies, children will get the best fit, mobility and safety at the water's edge.

Easy to reach lifting strap

Added soft collar for comfort and neck support

Elasticized back for a proper fit

Quick drainage superior drying and longer life provided by the bottom lining mesh

GOLD: CN-550

*** Inside patterned fabric is subject to change**

Soft foam and rounded edge design combine to make this PFD the most comfortable vest for children

Shorter front than conventional children's vests for enhanced comfort when sitting

Leg harness to help keep the vest in position and eliminate ride-up

Nimbus

CHILDREN'S VEST

What Set's Nimbus Apart:

- The original double collar Children's PFD. The outside collar is the traditional style which helps kids float on their back and provides head support. The inside collar helps stabilize and support the neck, good for days on the boat when there are vibrations from the water and boat engine.
- V-cut design at the front zipper. This is important as when your child is sitting the foam and vest are not riding up or hitting their chin or face. Once a child is fitted have them sit on the floor to see a true fit.
- Elasticized back for a custom and comfortable fit as kids bodies are different and ever changing
- Bottom mesh drainage system allows the vest to drain water and dry properly- which means your PFD can also last longer

Canadian Made Vests for the entire family

For Salus, the most important reason to manufacture in Canada remains the people. From worker to customer, from paddling enthusiast to champion sailor, people are the inspiration for Salus' designs, innovation, and commitment to staying true to its Canadian roots. See our full line of products to outfit your entire family in Salus.

STANDARD VEST SIZE CHART

	Size	Weight Range	Chest Sizes
Bijoux	9 - 25 lbs	4 - 11 kg	12" - 18" 30cm - 46cm
Infant	20 - 30 lbs	9 - 14 kg	16" - 22" 41cm - 56cm
Child	30 - 60 lbs	14 - 27 kg	18" - 26" 46cm - 66cm
Youth	60 - 90 lbs	27 - 41 kg	22" - 32" 56cm - 81cm

With the exception of the Bijoux (for which there is no standard), all Salus PFD's are designed in compliance with Canadian General Standards Board / CGSB Standard 65.11-M88, tested by Underwriters Laboratories of Canada / ULC, and approved by Transport Canada / TC.
