SAR Rescue Vest

OPERATIONS SAR-660

All Salus SAR vests were designed for swift water, ice water and shore base rescue professionals.

The Unique and easy donning adjustment system combined with the one-size fits all design is paramount in getting your team into position quickly. And when seconds count, these two critical features can often make the difference between saving a life and recovering a body.

The 100 newton / 22 lbs buoyant force is ideal for fast moving aerated water and to float you and the person (or animal) you are rescuing.

The large arm holes allow the rescuer full range of motion while the soft foam construction and high waist design permit easy bending that in combination make these SAR vests extremely comfortable in an (often) uncomfortable and fast moving situation.

SAR-660

Easy grab front shoulder adjustment

Convenient, two-way access, accessory pocket. With security zipper.

Large 1 1/2 webbing for easy pull forward and adjustment

High cut design for easy, unrestricted bending

22 lbs of Buoyancy

Operations - Back

ONE SIZE fits most, M-4XL
(36" - 60" chest / 91-152 cm chest)

SAR Rescue Vest

TECHNICIAN SAR-770

Designed with the same exceptional fit as our SAR-660, the SAR-770 takes search and rescue to a whole new level with its elevated features. Equipped with a quick release belt and tow line & carabiner, the SAR-770 facilitates swift and secure rescues in the most challenging situations.

The quick release belt on the SAR-770 features a stainless steel D-ring on the front, allowing for easy attachment and detachment. On the back, it accommodates the O-ring from the tow line, providing maximum strength and stability for an operation involving both the rescuer and the victim. These components are essential for maintaining a secure connection and ensuring the safety of all parties involved. Our SAR-770 is the go-to choice for search & rescue professionals requiring a vest to withstand challenging conditions while providing the utmost functionality, comfort and safety.

SAR Rescue Vest

COMMANDER SAR-880

Introducing the **SAR 880 Commander**, the ultimate upgrade to our SAR series. With the same exceptional performance features and benefits, this vest takes search and rescue to the next level. The **SAR 880 Commander** is equipped with two large cargo pockets, providing ample space to haul essential equipment such as gloves, radios, ice picks, carabiners, flashlights, and more. No need to worry about leaving anything behind - you can easily carry all your necessary tools with ease. Designed for convenience, the back features a hidden pocket that neatly stows a pair of leg harnesses, ensuring they are easily accessible whenever you need them.

Commercial

FISHING VEST

When your day is long and exhausting, having **comfortable gear** is paramount in making your work more tolerable. The Salus **Commercial Fishing Vest** is constructed with a unique combination of features that provide unparalleled comfort, fit and durability.

Mesh shoulders and large armholes offer welcomed freedom of movement while the soft foam, round edges and Dri-Lex liner provides hours of comfort and security.

The chest and front padding provides comfort from when being slammed against the rail or when hulling in traps. The smooth snag-free front ensures that lines, rails and traps do not get caught or snagged. **AND** with its versatile and low profile design, the vest can be worn comfortably over or under foul weather gear.

COMMERCIAL FISHING VEST

Mesh shoulder for light weight and optimal freedom of arm movement

Low profile sides for enhanced arm movement and comfort

Clean design with flat front to ensure no snag hazards. Adjustment buckles are hidden to allow smooth & comfortable gear under their work cloths.

High cut design for ease in bending & prevention of ride-up

Red: MP-330

Neoprene collar for added comfort against neck

3M™ reflective piping positioned high on the front and back for greater visibility

Patented soft foam and rounded edge design provide unprecedented comfort and fit

Dri-Lex Aerospacer® interior lining for optimal breathability, moisture absorption and enhanced comfort

Side adjustments for a clean and snag-free front

Accessories & Throw Bags

Amicus

Throw Bag - 80 ft 1/4" Cord - TB-880

The conical shaped bag allows for optimal unfurling while the extended bib allows for quick and easy stuffing and leverage to throw the bag to its full 80 ft. length.

Also available in Lime and Pink.

Sea - Throw n' Tow

50 ft, TNT-550 (Yellow / Black)

This two-in-one Throw n' Tow is an ideal companion for both white water and sea kayaking. 15 meter polypropylene line with spectra core and elasticized extension to absorb the shock when towing. Paddle Carabiner and extended bib for throwing leverage.

Adventure Lights

Guardian Dual Function LED Expedition Light with Clip

Visible over 1.5 km; lithium batteries last over 250 hrs; waterproof to 100 m; operates in temps -40 to +50 °C; impact resistant; dual function steady on or flashing. 12 pack mixed colours.

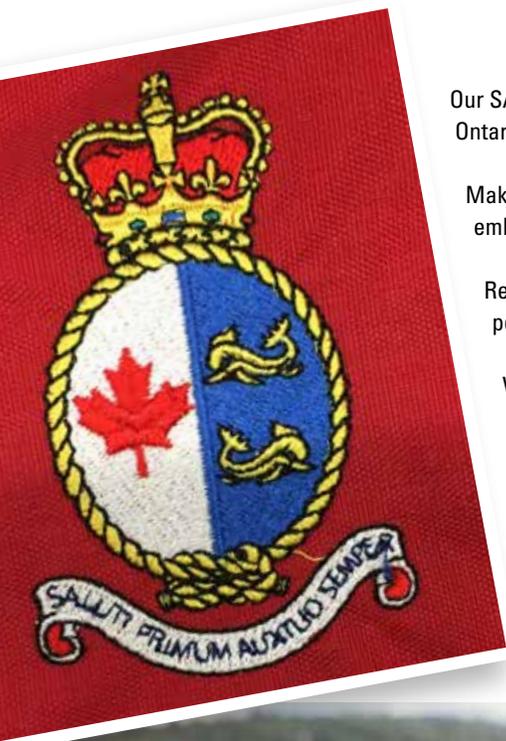

SAR Bag

Keep SAR items together and labeled with a custom SAR Bag! SAR bags can hold 1 x SAR PFD, 1 x Throw Bag, and accessories for the jacket.

(bags not a stock item, made to order)

Customize YOUR VESTS

Our SAR vests are proudly manufactured in Waterloo, Ontario, allowing us to provide tailored PFDs for your crew.

Make a statement on the water with personalized embroidery and logos on your PFD.

Require extra attachment points? Inquire about additional pockets and molle webbing.

Want extra breathability and comfort? Switch from a nylon lining to Dry-Lex.

While our standard SAR sizes range from M-4XL, we also offer custom sizes of XS-S and 5XL-6XL upon request to cater to the needs of all crew members. Contact us to learn more about all of the custom options available.

STANDARD VEST SIZE CHART

Size	Weight Range	Chest Sizes
SAR (One Size fits most)	90+ lbs 41+ kg	36" - 60" 91cm - 152cm
Solo and Commercial Fishing Vest
