RabooXP Lite 10.05.06 (Windows XP Pro SP3 Swedish Svensk) by R.exe.Q: How do I get all the models of the current model to display in a top level model I want to create a top level model to be able to go back and forth between the models. I have it set up like so in the App.js file. When I click the button in the top level model, I want it to display all of the other models. I was thinking of something similar to this code, but I get an error "Cannot read property 'forEach' of undefined". 2d92ce491b
