## KRaZy VOLuMe Activation

kRaZy vOLuMe is a small and easy to use utility that will make your computer sound goes max and min by itself, with slides between value: 30 to 100. Make a prank on your friends using this small application.Q: Android Gmail Issue I am having a Gmail Issue. I am using my Gmail Account for authentication, but I am getting authentication error. I am unable to post any mail to my Gmail account. Is there any setting I am missing here for gmail? A: Use the following steps - Settings > Accounts & Import > Add Account Select Gmail Select Export: Select: All of the below Select Name Enter an Email address Select Email address as username Select a contact method (i.e. phone number) Set the security type (i.e. Gmail) Check "Save the information entered in this field" Select Save as type: Select a destination Under Applies to Under Configured: Select off Q: Override ng-model from directive I am trying to override or stub ng-model in my directive. I have tried doing it using a super directive. I have tried setting the default value in link function, but that doesn't work. I have also tried extending the directive and this works, but I don't think it is a good practice because someone else will have to inherit from that. I need to be able to pass parameters to ng-model so that I can override them and any parameters to the directive from parent directive. Any ideas? 

```
var module = angular.module('myApp', []);
module.directive('myDirective', function() { return { restrict: 'E', transclude: true, template: "", replace: true, scope: { item: '=item' }, controller: function() {
```
