
Download AutoCAD LT 2017 Crack W/TOP

May 23, 2016 This hotfix resolves the following issue: The migration tool may crash when importing custom settings from previous releases. Cause Since version 2.10.9, we have encountered an issue where the migration processes and user settings created by the migration tool are not synchronized between previous versions and the new release. This resulted in failures in the migration processes, as a result of which users could not use their settings. This applied not only to individual data migrations, but also to migrations using policies. We fixed this by releasing version 2.11.2.
