What's New In Microsoft Visual Studio And .NET Framework Log Collection Tool?

The Collection Tool will collect available logs from all Visual Studio 2005, 2008, 2010 and .NET Framework 2.0, 3.0, 3.5, and 4.0 release installations on your computer. If you encounter any setup issues and contact Microsoft Support or Visual Studio on Microsoft Connect, you may need to provide relevant installation logs.

The Collection Tool is simple to use and will collect the logs for you. You do not need to make any modifications to the default installation. The logs will be sent to a text file where you can later view them with or without .NET Framework 3.5 installation on your computer. The Collection Tool has been tested on all supported versions of Visual Studio and .NET Framework, and the logs are collected from different sources depending on your Microsoft Windows version and installation

options. You can choose to have the Collection Tool automatically start at system start and collect the logs for you from the last few seconds to the last minute. The Collection Tool also allows you to monitor the number of log files that were saved in your folder for you at specified time intervals. Use a keyboard shortcut to directly save the log files to your specified folder at your request. You can also edit the filter string at the bottom to filter the logs that are collected by the tool. Installation Get

Microsoft Visual Studio and .NET Framework Log Collection Tool

This tool can be downloaded from any of the following sources: In the downloads section of the Microsoft Connect Portal you can choose from the following links: Visual Studio Log Collection Tool For Windows Vista and Windows Server 2008: For Vista and Server 2008, Microsoft Support has packaged the Log Collection Tool as part of a fix.
