The difference between good work in process and bad work in process is your attitude towards it, your expectation about it, your ability to find a way to make it better. If you walk into the average jewelry store these days, you will find the usual suspects: bracelets, rings, necklaces. All the things we grew up with and have seen on family and friends. You can ask them to make you something personal, they have the capability, but the question is do you know what you want? Some people come into my studio and ask me, what is this, how can I use it and what does it do. The cameras I like to call "Normal" and "Abnormal." Normal is the amateur day to day person, Normal doesn't want something complex and amazing. Normal just wants to share their thoughts with the world. 91bb86ccfa
