What is WinMend System Doctor? WinMend System Doctor is a powerful and efficient system scanner, which identifies and fixes PC security issues by scanning your system for vulnerabilities. WinMend System Doctor helps you to find and fix...Goldschmidt's Gift I was born with a photoreactive retinal condition that, as a child, would render me blind in the dark. Even at my most alert and engaged, my eyes wouldn't always adjust, so I have always lacked the ability to read in total darkness. But in the midst of my blindness, another defining characteristic arose: an intense, if unorthodox, love for cinema and jazz. For years, I tried to make sense of the connection between my visual impairment and my love of films, but never could. When I spoke to psychologists who followed the path of my condition, though, they said the connection wasn't a coincidence. As a child, the sighted world—like the real world, where I live—was largely a confusing, half-lit environment. My parents were excellent, supportive parents, but, when I was a young child, they talked to me in near-darkness. And as a child, movies and jazz were widely perceived as being dark, which they are. They are a world of shadows in a world of light. And so, when I watched a

film or listened to jazz, the combination created in my mind a comfortable atmosphere of darkness. It was the darkness of a movie theater and the dark of a jazz club, a darkness both palpable and comforting. In what way do you think your condition has changed your life? After the loss of my sight, my use of light sources and other visual stimulation increased. I became obsessed with light. I can see better today than I ever can, but the change in my life was not simply one of sight. My eyes became additional organs and my brain became a new organ of perception. I became a kinesthetic, verbal and poetic intelligence. I had to learn the new world. I became more aware of rhythm, color, volume, pitch and texture, and these also became the new modes of perception. I found I had developed an understanding of perspectives and objects in a way that was impossible before. These are strengths I have used to help me create new forms and modes of expression, language and therapy. In what way have you seen or heard about people with your condition adjust

Brittle type 1 osteosarcoma (BTO1) is a recently described form of osteosarcoma in which the tumor is composed of 100% osteoid with less than 20% matrix. Based on genetic evidence, BTO1 appears to be a chondroblastic variant of osteosarcoma. We assessed disease-specific survival in 20 patients with BTO1 compared with 21 patients with nonbrittle osteosarcoma (NBO), 14 of which had conventional osteosarcoma (COS). A difference between the BTO1 and NBO groups was identified on univariate analysis using the log-rank test (P Pages Sunday, August 15, 2009 Do you have to be five to understand this? From the car. About a week ago, a grown up was sitting in the parking lot of a local coffee shop for the purpose of writing. In the parking lot. And this is pretty standard for this grown up. I was in my vehicle, driving by and I saw this. I made a statement about the kid--What the hell is he DOING? She responded by saying, "He's been there for hours. It's like any other coffee shop
