WhatRuns For Firefox Crack + Free Download (Final 2022)

WhatRuns is a nifty new way to quickly and effectively figure out what is powering a website. WhatRuns for Chrome Description: WhatRuns is a nifty new way to quickly and effectively figure out what is powering a website. Bifrost is a neat jQuery plugin that can be used for displaying alerts from your websites in the form of small popups. To access such alerts, simply move the mouse pointer over the links that appear on your page and click it. In the window that pops up, you'll find all the information regarding the specific alert as well as its title and detailed description. Bifrost will look through all the links on your page and then display the alert in front of them. Bifrost also offers a choice of many different alert designs, suitable for most of the sites. Once you've set a particular design, you can go ahead and apply it to all or a limited set of links on your page, or you can create custom alerts as well. In addition to such alerts, Bifrost can be used to show animated animated gifs or jpgs. Simply save the image you want to show to a folder on your hard drive, reload the page and click on any link that is present on the page to view an animated gif. The alerts can be pretty much any size you wish, and Bifrost is super easy to use. Once you've set the alert, you can choose between either "open" or "show" and "hide" when each one is clicked. Here are some of the more interesting uses of Bifrost that you can find on the web: Animated alerts are a novel addition to the usual popups Yet another successful use for Bifrost is to help users bookmark your page. Bifrost allows you to save a string that will function as an alert and that will pop up on the links that appear on your page when users hover over them. Bifrost is a completely free plugin that can be downloaded from the Bifrost official website. The download is extremely lightweight, weighing just 12 KB on average. The creator is willing to provide bug fixing and regular updates in the form of new alert designs so be sure to check for the latest version. Bifrost for Firefox Description: The Firefox users can get Bifrost for their Firefox browser from the official Bifrost website. Just go to Addons for Firefox and then type in Bifrost to find the suitable plugin.

WhatRuns For Firefox Crack Free

WhatRuns is a neat, little development tool that should come in handy for any web developer or user who's job implies running web competition analysis or website profiling tasks by offering a convenient way of identifying what web technologies run a website. Convenient web development tool available for both Firefox and Chrome Speaking of convenience, note that WhatRuns is available in the form of browser extensions for Google Chrome and Mozilla Firefox. The extensions are practically identical, but we're going to focus on the Firefox version in this review. Getting to grips with this tool couldn't be any easier. Simply deploy it on your computer's Firefox browser from its official Add-ons page, visit any given website, and click the extension's icon. Swiftly and conveniently gain a deeper understanding of what technologies are used to run a website Since the analysis is almost instant, you should be greeted without delay by a condensed and modern-looking user interface which displays the so-called technologies in a very intuitive and organized manner. Even more exciting is the fact that the extension is capable of providing you with a lot more information regarding each particular technology without requiring more than a simple mouse click on your part. Furthermore, you'll be pleased to hear that website themes and fonts haven't been overlooked either. To find out more about any component, simply hover the cursor over it and click the "Know More" tooltip. Each technology has its dedicated WhatRuns page which includes a comprehensive list of all the websites that are currently using it, sorted by popularity. Analyze the inner workings of most websites with the help of this simple extension To conclude, WhatRuns is a without a doubt a very efficient and useful tool that should find its way into most web developers' browsers. It's available for the two most popular browsers out there, it's easy to install, incredibly easy to work with, it looks great, it's lightweight on resources and, best of all, it's free. User Reviews Firefox 55 Star Basic Firefox version 4 out of 5 Users No Reviews The Google Chrome version looks like this with the same basic features Can't say I would recommend it for non techies as you need to know a few things about HTML and CSS to get the most out of it. For techies it's a great tool. Older 55 91bb86ccfa
