Q: Sum of only elements in an array I'm having trouble creating an array that will simply sum the elements in the array. I want to do it by initializing the array with zero and then summing and putting the results in the array. But I'm getting the result of zero for every number in the

---

array. What am I doing wrong? `int i = 0; int sum = 0; int[] array1 = new int[10]; for(int j = 0; j < array1.Length; j++) sum += array1[j];` If you prefer not to use Linq though, you could do it like this: `int sum = array1.Sum();` A: You aren't summing. You are overwriting your sum variable. Change `sum = array1[i];` to `sum =`

---

array1[i] + sum;. I'd also advise the use of the long form of the for loop for clarity: for(int i = 0; i

The source added that while Trump has not yet been in touch, Defense Secretary Jim Mattis and national security adviser John Bolton, who have each opposed the Syria withdrawals, will be notified shortly after the

The House of Representatives, however, on Saturday afternoon officially condemned the decision to withdraw. “We are alarmed at the prospect

of withdrawing American forces from Syria at a time when ISIS and other terrorist groups could regain momentum and use the space to reconstitute,” said a joint resolution passed by a 407-15 margin in the House on Saturday. “The swift and decisive action that our nation must take will be the only means to ensure that ISIS cannot

regain the lost territory,”  
the resolution says.
