=====
Any Duplicate Photo Finder is a high-performance, step-based, time saving, and efficient photo duplicate finder and photo merger application with a beautiful and user-friendly interface. It supports over 40 photo formats, including the most popular formats like JPG, BMP, PNG as well as some exclusive camera formats such as CR2, NEF, PCD, etc. It supports both face and name detection, and is able to merge identical pictures into a single one without loss of quality. Moreover, the supported formats are not to be ignored. The app supports all major formats including the most popular formats like JPG, BMP, PNG, PCD, CR2, NEF (Nikon RAW), etc. Furthermore, both face and name detection can be turned on and off. The application is also highly intuitive and easy to use, so you can do a sort of cleaning process in a just a couple of clicks. Users can choose the actions to perform and preview the results before they start. After the cleanup, the photos will be marked with the canvas while the duplicate images will be displayed in the preview window. In the preview window, users can compare the duplicate images with the originals and verify that they indeed are duplicates. In addition, the application can detect duplicates by names and also by image itself, so if you have the same photo with two different names, they will be flagged.
